Safety Precautions

This section describes the items that should be followed for safe use of this machine. Be sure to read this section before using the machine.

Warning Symbols

To use the machine properly and to prevent human injury and damage to properties, the following warning symbols are used. Read the meaning of the symbols to understand and then read this guide.

Indicates that incorrect handling by ignoring this symbol may cause death or serious human injury.

Indicates that incorrect handling by ignoring this symbol may cause human injury or damage to properties.

Examples of symbols

The  symbol indicates a prohibited action. A specific prohibited action is drawn inside or next to the symbol. (The left figure indicates that disassembly is prohibited.)

The  symbol indicates a forced action or an instruction. A specific instruction is drawn inside the symbol. (The left figure indicates an instruction to remove the power plug from the electrical outlet.)

Power Plug

■ If the following options are connected, you will have two or more plugs.

- Face down offset stapler
- Multifunction finisher
- High capacity feeder
- High capacity stacker

Installation Location

- Place the machine on a flat or stable surface. Otherwise, the machine might be inclined or fall down, resulting in human injury.
- When installing the machine without the use of a special scanner stand, do not install the machine in a location where it will be exposed to vibration from other machines. Otherwise, the machine may drop or fall and injure someone.
- The machine has ventilation openings. Place the machine at least 100 mm (3 15/16") from walls. If the ventilation openings are blocked, the inside of the machine may become hot and a fire might occur.
- Do not place the machine in a dusty or humid location. Otherwise, a fire or an electric shock might occur.

Power Connection

- Install the machine near the wall socket to avoid using an extension cord between the machine and the wall socket. If an extension cord is absolutely required, do not use longer than 5m (15ft). Otherwise, a fire or an electric shock might occur. 
- Do not damage or rebuild the power cord. Placing a heavy object on the cord or pulling or forcibly bending the cord may damage the cord, resulting in a fire or an electric shock. 
- The power cord supplied with this product can be used only for this machine. Do not use it for another electric product. Otherwise, a fire or an electric shock might occur.
- Do not connect a power cord other than the scanner (HS5000) cord to the scanner socket on the machine.
- Do not plug or unplug the power cord if your hands are wet. Otherwise, an electric shock might occur.

CAUTION

- Connect the plug securely to the electrical outlet to avoid a loose connection.
- Do not pull the power cord when unplugging it. Otherwise, it could become damaged and a fire or an electric shock might occur. Be sure to hold on to the plug when unplugging the power cord.
- If the machine will not be used for a long time, such as during a holiday, unplug the power cord from the electrical outlet for safety.
- Pull out the power plug from the electrical outlet at least once a year and clean the prongs of the plug and their surroundings. Dust collected on these areas can result in fire.

Handling

WARNING

- Do not place water containers or metallic objects on the machine. If water drips inside the machine or a metallic object drops inside it, a fire or an electric shock might occur.
- Do not insert or drop any metallic material or flammable substances into the machine through any opening. A fire or an electric shock might occur.
- Do not remove the covers. Otherwise, you might be electrically shocked by the high-voltage part inside.
- Do not disassemble or rebuild the machine by yourself. Otherwise, a fire or an electric shock might occur.
- If the unit emits excessive heat, smoke or foul odor, immediately press the sub power key, and turn off the main power switch. Next, unplug all the power cords and contact your dealer (or authorized service representative). Otherwise, a fire or an electric shock might occur.
- If something drops inside the unit, immediately turn off the main power switch, unplug the power cord and contact your service representative. Continued use might result in a fire or an electric shock.
- When using the IC card reader
The IC card reader continually emits a weak signal. If you are using a cardiac pacemaker and notice any abnormalities, immediately move away from the machine. Consult a physician immediately.

CAUTION

- Do not insert your fingers in the areas around the standard tray or stacking tray. Otherwise, an injury might occur.
- Do not touch the moving parts of the machine. Otherwise, an injury might occur.
- Be careful of protruding parts and metal terminals when inserting the hand inside the printer such as removing jammed paper. Otherwise, an injury might occur.
- The inside of the printer may have areas with ink. Be careful not to let the ink come in contact with your hands or clothing.
Should ink accidentally make contact with your hands, wash it off with detergent as soon as possible.
- When moving the machine, contact your service representative.
If you try to forcibly move the machine, the machine may overturn, resulting in injury.

Ink Cartridge

CAUTION

- Avoid contact to eyes and/or skin. If ink gets into your eyes, flush it out immediately with plenty of water. If ink comes into contact with your skin, wash it off thoroughly using soap.
- Allow plenty of ventilation during printing. Seek fresh air immediately if you feel unwell during use.
- If you feel sick, seek medical advice immediately.
- Use the ink only for printing purposes.
- Do not dispose of used ink cartridges by burning. The ink is combustible and can cause the fire to grow, resulting in burns.
- Store ink cartridges out of the reach of children.
- The ink is a combustible liquid. In the event of fire, use potassium carbonate mist, foam, powder, or a carbon dioxide fire extinguisher.

Before Use

This section describes the precautions that must be observed before using the machine.

Installation Location

Observe the following precautions.

Handling

- Do not use the main power switch to turn the machine OFF or unplug the machine during operation.
- Do not open any of the covers during operation.
- Do not move the machine.
- The machine contains precision components and moving parts. Therefore, do not perform operations not described in the guides.
- Do not place heavy objects on the machine or subject the machine to strong shocks.
- Open and close the covers gently.
- After turning the main power switch OFF, wait until the main power lamp goes off before turning the main power switch ON.
- Perform head-cleaning if the machine will not be used for a long time or before using the machine after a long period of non-use.
Ink may deteriorate or dry up in the ink feed path inside the machine, resulting in clogging of the print head.
It is recommended that head-cleaning be performed regularly to prevent this from occurring.
- Do not touch the print head, as this can result in malfunction or deterioration in print quality.
- Always keep all the color ink cartridges in the machine. Do not leave the machine with the ink cartridges removed, even when not using the machine.

Originals

If you connect the optional scanner, you can copy or scan an original by placing it on the platen glass or in the ADF to be read.

If you use an original that is not compatible with this machine, it may result in problems such as paper jamming, soiling or malfunctions.

Printing without margins cannot be performed. Margins are always added around the edges of the paper.

■ Printable Area (Margin)

Some areas around the edges of the paper cannot be printed regardless of the data size of the original. The size of the blank margin left by the edges of the paper (where printing is not possible) varies depending on the model.

See "Maximum Print Area".

- When [Printable area] is set to [Maximum] in [Admin. Settings], the printable area can be changed to 1 mm (0.04") from the edge of the paper. Depending on the content of the original, text or images may be lost or bleeding may occur.
- Even when the paper size is within the maximum print area, a margin is always provided.
- When copying, the machine cannot scan the 1 mm (0.04") margin of the original.

■ Printable Area of Envelopes

- C4: 229 mm × 324 mm (9" × 12 3/4")
- C5: 162 mm × 229 mm (6 3/8" × 9")
- C6: 114 mm × 162 mm (4 1/2" × 6 3/8")

The printable area on envelopes is the area enclosed within 10 mm (3/8") of the edges of the envelope.

Any part of the image that does not fit within the printable area is not printed.

- When printing on envelopes, it is recommended you install an optional stacking tray.
- To also print on the flap section, you must register the envelope size including the flap section. For more information, contact the dealer (or the maintenance or service company).
- You cannot use duplex print when printing on envelopes.

- The feed tray is not available for ComColor 9110/9110R/7110/7110R/3110/3110R.
- Depending on the type of paper, operating environment, and storage conditions, even paper meeting these size and weight specifications may not be able to pass through the machine in some cases.

■ **Do not use the following paper types as they will cause problems such as paper jamming or malfunctions.**

- Paper that does not comply with the conditions in the basic specifications
- Paper with a processed surface, such as thermal paper or carbon paper
- Curled paper (3 mm (1/8") or more)
- Paper with wrinkles
- Bent paper
- Torn paper
- Paper with ripples
- Coated paper such as art paper
- Paper with jagged edges
- Glued paper
- Paper with holes
- Glossy paper for photographs
- Transparencies
- Yupo paper

■ **Always use paper from a sealed package.**

■ **After finishing the print job, return the unused paper from the standard tray to the package and store. If you leave the paper in the standard tray, the paper may curl and cause paper jamming. (It is recommended to take necessary sheets out of the wrapping paper and load them to the standard tray.)**

■ **If the paper is not cut cleanly or has a textured surface (such as drawing paper), fan the paper before use.**

■ **Store paper flat, away from high temperatures, high humidity, and direct sunlight.**

Printouts

■ **When using duplex printing, the edges of the paper may become dirty depending on the original.**

■ **Printouts lose their color (discolor) over time due to various chemicals in the air and light. You can protect printouts against discoloration by allowing the printout to fully dry and then inserting it into a glass frame or laminating it.**

■ **When storing printouts in a clear file folder, be sure to use only those made of polyethylene terephthalate (PET).**

■ **Printouts can lose color when they come in contact with water or sweat. Avoid storing printouts in a place subject to moisture. Writing on printouts with an oil-based pen can cause bleeding.**

■ **The print density of the printout immediately after printing differs from the print density 24 hours later. Print density decreases over time.**

■ **Do not place printouts from this machine on top of printouts from a laser printer or copier that uses toner. The paper might stick to the printed toner and the toner might transfer to the printout.**

Materials Not to Be Printed

- **Do not use the machine in any manner which violates the law or infringes on established copyrights, even when making copies for personal use. Consult your service representatives for further details. In general, use discretion and common sense.**

Ink Cartridge Storage and Handling Precautions

Ink cartridges for this machine are made of paper. For this reason, cartridges may become deformed and unusable if stored incorrectly or in an unsuitable environment. Store the ink cartridges properly, according to "Storage".

■ Storage

- Be sure to store the ink cartridge horizontally in the direction indicated by the this-side-up mark.
- Avoid freezing or placement under direct sunlight. Store in areas between 5°C and 35°C (41°F - 95°F). Do not store in locations subject to extreme changes in temperature.
- If the plastic bag is opened but the ink cartridge is not to be used right away, store the ink cartridge properly and insert it into the machine as soon as possible.

■ Handling Precautions

- Do not shake the ink cartridge. This can create bubbles, resulting in a deterioration in print quality.
- Do not add ink into the ink cartridge.
- Remove the ink cartridge from its plastic bag just before inserting it into the machine.
- Adequate operation temperature is 15°C - 30°C (59°F - 86°F).
Using the ink cartridge outside the adequate operation temperature range can result in a deterioration in print quality (reduced ink discharge).
The spraying properties of the inkjet printer can vary depending on the ink viscosity. In particular, at lower temperatures, the ink viscosity increases and can result in clogging of the print head. Follow the information on the operation environment and storage temperature, check the manufacturing date, and use soon after purchase.
- If the cover of the ink cartridge is removed and the ink cartridge is left for a long period of time without being used up, various chemicals in the air can cause the ink cartridge to deteriorate.
Using ink that has deteriorated or changed in quality can damage the print head or ink flow path.
- Do not dump the ink left in the cartridge into the sewers.
- The ink is a combustible liquid.
In the event of fire, use potassium carbonate mist, foam, powder, or a carbon dioxide fire extinguisher.

Disposing of Used Ink Cartridges and Cleaning Tanks

- **The ink in the cleaning tank cannot be used for printing.**
